Statistical API

 Get Notifications

 Airport & Global Worldwide delays. *How many flights are delayed or canceled right now or in the past? Delay statistics and delay index at an airport now and back then.*

 Airport Daily Routes Statistics. *Where flights are going from this airport and how many flights a day occur in these directions?*

 Flight Delay Statistics. *How often is the flight delayed and how much? Detailed statistics grouped by hours and airport of departure/arrival, delay brackets and percentiles*

Miscellaneous API

 Local Time at the Airport *Get local time by specifying just an IATA or ICAO code of the airport*

 Solar and Day Time at the Airport. *Calculation of sunset, sunrise, civil, nautical and astronomical dusk / dawn times, golden and blue hours, sun elevation and azimuth.*

 Distance between airports. *Calculate the great-circle distance between airports*

 Flight Time between Airports. *Calculate theoretical and realistic (machine-learning based) flight time between specified airports*

 List of all countries

API Supported Response Formats

- JSON (default, `Accept: application/json`)
- XML (`Accept: application/xml`)
